

Why do people migrate?

1. Find a picture to illustrate the place where you live. Annotate it (using different colours for negative and positive) to describe some of the negative (push) factors that might make you want to leave and positive (pull) factors that make you want to stay.
2. Now find a picture from another country that you might like to live in. Do the same for this picture (making sure you use the same colours for push and pull – and that you name the country!).
3. Give each picture a suitable title and then print them out – either duplex or two pages to one side (to save paper).
4. Describe some of the obstacles to you migrating to this new country.
5. Overall, would you migrate to this new country? Give reasons for your answer – trying not to just repeat the points from above.
