

# Sustainable management of marine resources

Brief presentations to the rest of the group + single-sided A4 handout on Wednesday:

- *EU Common Fisheries Policy (regional quotas)*
- *Marine conservation zones (Marine Protection Areas, MPAs)*
- *No-catch zones (No Take Zones, NTZs)*
- *A campaign – e.g. Fish Fight*
- *International Whaling Commission*
- *Marine Stewardship Council*
- *Aquaculture*

In each case:

- Details of what it is
- Pros/cons
- Example of how it has operated to help manage marine resources sustainably

Needs to be more than repeating material from the Student Guide – use this as a starting point
