8 February 2017

Dear Parents/Guardians

Re: *Geology Help Sessions*

The Geology Department are organising a sequence of intervention sessions which will be open for your son/daughter to attend in the half-term following the February break. These sessions have been designed to reinforce particularly important or difficult subject areas and lead on directly from their performance in the mock exams. Your son/daughter should be aware of their achievement in each of the subject areas and will therefore be able to know which sessions are most critical for them to attend.

We would like to draw your attention to both the preparatory reading, evidence of which must be brought to the session, and the consolidation tasks available on the BWS school website. In order for your son/daughter to make the maximum possible progress, this work will need to be completed in good time.

The sessions are open to all students but it is highly recommended that any individual who performed below their target by 2 or more grades in their mock should be in attendance. A register of attendance will be kept by the lead teacher of each session.

We attach a timetable of the sessions, please pay careful attention to the locations and times as it has not been possible to keep them uniform each week. We have ensured there is adequate travel time between sites. Please feel free to contact myself, mxt@bws.wilts.sch.uk should you have any further questions.

Finally, if you have taken a copy of the timetable from Parents Evening please note the date of the first two sessions has been adjusted.

Yours faithfully

The Geology Department
