22 January 2019

Dear Parents/Guardians

We have reviewed the results of the preliminary Biology exam and your son's score was below his target grade. We therefore think he would benefit from some additional help. The Biology Department is offering booster sessions during lunchtime to go back over content, improve understanding and practise exam questions. We strongly recommend that your son takes advantage of this opportunity as it will help improve the quality of his answers in future exams.

To gain the most from these sessions we would recommend that your son spends some time prior to the booster sessions looking through his notes and using his revision book if he has one. Any questions and problems can then be fully addressed during the session.

Date	Topic
1 Feb	Cell Structure and Cell division
8 Feb	Transport in Cells and Plants
1 March	Animal Transport
8 March	Immunity, Disease and Treatments
15 March	Homeostasis and Excretion
22 March	Planning and Evaluating Skills

The first booster session will take place on Friday 1 February at lunchtime between 12.00-12.30pm in the Biology Lab. We hope that you will encourage your son to attend. In the meantime, if there is anything that you wish to discuss then please do not hesitate to contact me.

Yours sincerely

Daniel Brown  
Biology Department
